

ADRIZA DEY

PROFILE

Motivated third year B.Tech student with a strong foundation in C, C++, Java, Python, and HTML, along with basic web development knowledge. Passionate about learning new technologies and applying problem-solving skills to real-world challenges. Known for effective communication, teamwork, and a proactive attitude toward growth and innovation.

PROJECTS

Online Video Library Management System

Contributed as an active team member in a 4-person group for 6 months. Developed a web-based platform for managing and streaming video content. Responsible for frontend implementation using modern UI practices, ensuring responsive and intuitive navigation. Implemented and integrated online payment gateway for subscription and transaction processing. Collaborated with backend teammates to ensure smooth API integration, user authentication, and seamless user experience.

Weather Forecast Web Application

Developed a responsive weather forecast web application as part of a hackathon project in a collaborative team environment. Contributed primarily to the frontend using HTML and CSS, designing an intuitive and user-friendly interface to display real-time weather conditions, temperature, and forecast details. Focused on clean layout design, responsiveness across devices, and enhancing user experience.

CERTIFICATIONS

Oracle Certified Associate Foundations Associate (2025)

Earned the Oracle Certified Foundations Associate certification, demonstrating foundational knowledge of AI concepts, machine learning basics, and their implementation within Oracle Cloud Infrastructure. Validates understanding of cloud-based AI services, core data principles, and emerging AI technologies.

Start Career in Cybersecurity: The Ultimate Guide by Udemy

Gained foundational knowledge of cybersecurity concepts, threats, ethical hacking basics, network security principles, and career pathways through Udemy coursework structured.

30 HTML, CSS & JavaScript Projects: Beginners' Guide

Built practical frontend projects using HTML, CSS, and JavaScript, strengthening skills in responsive design, DOM manipulation, and modern web development.

101 Python Projects: Complete Python Course

Developed hands-on Python programming skills through Udemy projects, covering core concepts, problem-solving techniques, automation, and real-world application development from fundamentals.
